Division Meeting May 27th, 7pm

(Location: Lakeview Village Campus)

Clinic: Santa Fe in WWII

Bob Walz will be sharing some history on the Santa Fe in World War II. This clinic examines how the Santa Fe responded to the unprecedented challenges posed by World War II. The clinic describes the great increase in the number of military bases, and military production facilities served by the Santa Fe. It then examines the personnel, equipment and infrastructure challenges and the Santa Fe response. Finally, it looks at the Santa Fe response in terms of passenger, freight and military train operations. It concludes that the Santa Fe helped win World War II by providing timely transportation services to a greatly expanded customer base. History is one of the most fascinating parts of our hobby and always helps us when replicating in our modeled empires. Can't wait to hear this one.

Clinic: Show & Tell

It's your opportunity to share your latest project. Doesn't matter if it's finished or not or if you have a question on how to move forward it's a great chance to ask. Let's have fun and see what's being created in our Division!

Come Join the fun!

Mtg Location: Lakeview Village Campus

See last page for details

Superintendent Report: *Martin Wade*

Distraction, Motivation or both aka Planes(?), Trains, and Automobiles (plus boats). I have always wanted to get an Electric RC Airplane, but Lora says I have no time. Well, she's right so I don't have one, yet. But I do have a 69 Dodge Charger and recently I've spent quite a bit of time working on it. It's been fun and I made quite a bit of progress. Like trains, the to-do list is long and it's never done. But it did distract me from my model train layout. Then there was the fishing boat with a new trolling motor installation, cover upgrade, and a stupid accelerator pump leaking gas on the outside of the engine. More distraction. But with all that behind me (sort of), I do find I am even more motivated to get back on the layout. So maybe distraction is motivation and not all bad???

Speaking of layouts, it was fun to go to the 2nd Layout Tour on April 26th and see 3 very diverse layouts. Thanks to Phil Stock, Bill Scheerer, and Dan Wiltshire for sharing their railroad empires. It was a lot of fun. Which is a great lead into the Op Sessions and layout tours for our June meeting. We will announce the locations/timing at May's meeting so be ready to sign up to get "on track"

Don't forget your Show and Tell for the May meeting and learn about WWII operations from Bob Walz. It should be another great time.

Hope your distractions are also your motivation to get working on your railroad empire soon! Martin

Clerk Report: *Missy Levy reporting for John Fales*

The Turkey Creek April meeting was held at our usual location on Tuesday April 22. Martin Wade was out sick so Gary Davidson stepped in and called the meeting to order and reviewed business that members should be aware of. The three Saturday Layout tours were mentioned and at the time of this printing, were held on April 26th.

Mark Sisk presented a clinic titled, "Creating Water Effects.". This clinic took us through a step by step process of how to create water and the tricks of the trade to make water on your layout realistic.

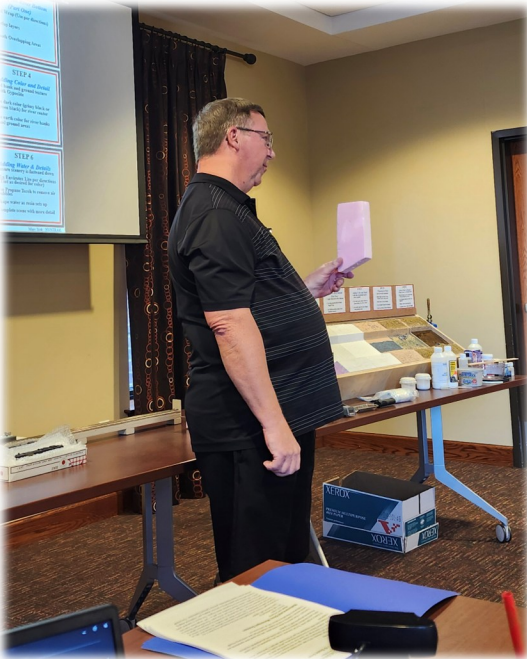

After a brief break, our second clinic presentation was given by Dale Phetteplace who spoke about "Diesel Upgrade," Again, this was a great presentation and very informative. We are fortunate to have incredible modelers share their expertise with all of us.

Don't forget that next month is Show N Tell month. Make sure to bring something that you are creating. The meeting date is May 27 at our usual location at the Lakeview Eastside Terr Conference room.

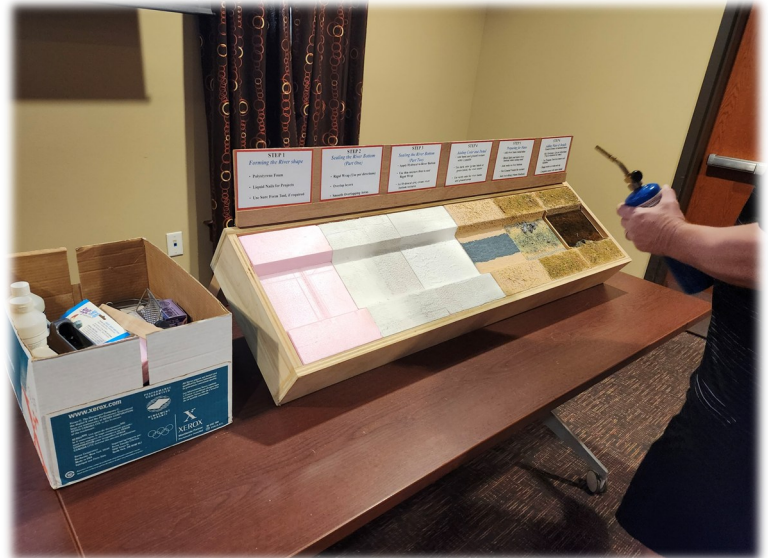

See you then! Missy

Meeting Highlights April 22, 2025

Clinic: Creating Water Effects By Mark Sisk

Mark takes on a step by step journey on how to create wonderful scenery by including a water effect that is realistic.

Step 1—Forming the River Shape

Step 2 and 3—Sealing the River Bottom

Step 4—Adding Color and Detail

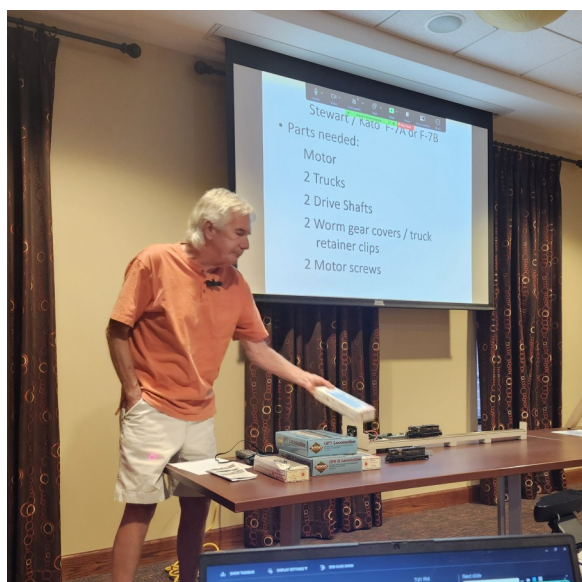

Step 5—Preparing for Water

Step 6—Adding Water Details

Meeting Highlights April 22, 2025 con't

Clinic: Deisel Upgrade By Dale Phetteplace

*Like Mark, **Dale** takes us on the how to upgrading your Deisel... what to do and what to avoid.
Another very informative clinic packed with tips.*

Layout Show & Tell Saturday 4.26.25:

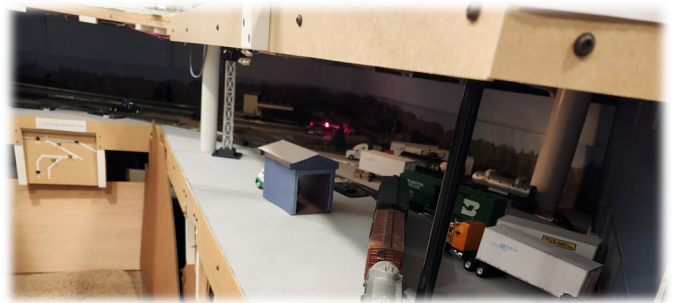

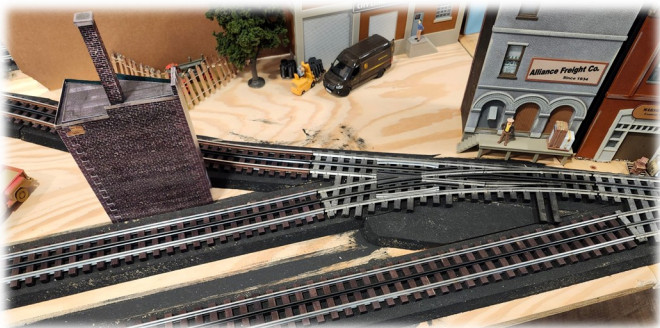

Exploring the Keokuk & St Joseph Railroad – O Scale 3-rail at Dan & Jayne Wiltshire's home.

Moving people and freight between 1970-1990, this freelance single-track railroad roughly follows the old Hannibal-St Joseph right-of-way across northern Missouri. One feature is a 1/3 scale length (8') span over the Grand River west of Chillicothe. Another feature is Disneyland-Marceline, which meets the requirement for a Disney play area negotiated as part of the model railroad's "land lease" of the basement.

For O scale in a tight area: The 34" diameter curves are negotiated by 3-rail Lionel trains, and transitions between the two main levels are accomplished by behind-the-scenes along-the-wall 3% grades.

The 6'x23' + 8'x9' layout is under construction, with the lower level operational and some scenery. Starting in the St Joseph Industrial Park and continuing through Chillicothe to Marceline is about 140' of continuous run.

Layout Show & Tell Saturday 4.26.25:

Exploring the Baltimore and Ohio, Monongah Division at Bill Scheerer's home.

The Monongah Division of the Baltimore and Ohio Railroad is located in my finished walk-out basement. It represents operations between Cumberland, MD on the East and Parkersburg, WV on the West, with Grafton, WV being the center of activity between the two. I did not attempt to recreate the prototype but rather to model the essence of the B&O in this part of the world. The Monongah Division is set in the 1950's, steam diesel transition era, with a + 240' single track main line and a + 40' branch line to Kingwood, West Virginia. The layout is operated point-to-point with the end points being a common staging yard. Additional staging occurs on the Cowen Subdivision and the Fairmont Subdivision.

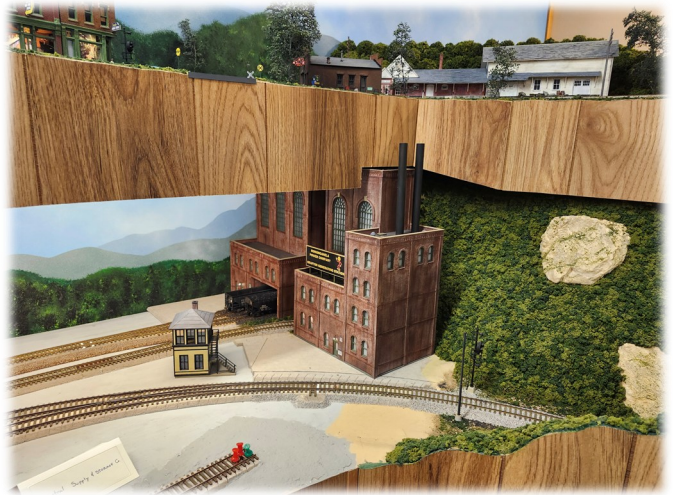

The overall design is two level track plan with one helix hidden under mountains, visually transitioned into the scenery. The upper level has no visible means of support. Pushers and Helpers are used between Grafton and Cumberland. The bench work is constructed as “stand alone”, meaning it is an around-the-wall and peninsula layout, all free from the walls and ceiling for easy removal in the future if it becomes necessary.

Layout Show & Tell Saturday 4.26.25:

Exploring the Baltimore and Ohio, Monongah Division at Bill Scheerer's home. Cont'...

Scenery is approximately 40% complete. The railroad is signaled with the B&O's unique approach lighted Color Position Light Signals (CPL) and the layout's 12 Controlled Points are operated from a reproduction GRS control machine built with parts from the D&RGW's Winter Park to Yarmony, CO machine.

Layout Show & Tell Saturday 4.26.25:

Exploring the C&S Cottonwood Subdivision at Phil Stock's home.

The Cottonwood Subdivision of the C&S is in one of the semi-finished basement rooms. It follows the fictitious story of the C&S having found an alternative route from Leadville to Gunnison over the continental divide. This allows for both C&S and D&RGW traffic. It will primarily be a showcase of C&S equipment in On30 gauge. This scale/gauge allows me to customize/create equipment that has not been produced.

The layout is in an area approximately 15' by 16' in an 'F' design. The layout will be modeled in the late teens to early twenties. No towns have been named yet. Areas of interest like towns, canyons and mining have been designed.

The track plan is defined for continuous running and limited operations due to the size. The main town is at 44" from the floor. Minimum mainline radius is 24". No engines are larger than 2-8-0. Traffic will begin and end in a small town with a yard and engine facilities and proceed around the layout to industries like mining and livestock customers. Most areas will represent notable areas along the C&S right-of-way. There is no scenery yet. The track plan is in its final phase with elevations being defined. The current plan is to build turnouts using Fast-Trak templates and Micro Engineering flex-track. There is no wiring in place yet. Control will be DCC using MRC wireless control with future update to JMRI.

NATIONAL MODEL RAILROAD ASSOCIATION
2025 National Convention

STATION No. VI

Hosted by:
the NORTH CENTRAL REGION

July 14-19, 2025

Open to ALL model railroaders! You do not have to be an NMRA member to attend! **REGISTRATION IS OPEN!!**

Our location – Sheraton Detroit-Nov, MI
A suburban location with FREE parking!

CONVENTION GOALS and HIGHLIGHTS -

Our main objectives are to provide events of value, items attendees will see as worth their money, all at the lowest possible cost. ** We will honor the traditions of past conventions but at lower cost and with greater flexibility. ** This convention will be shorter, starting at 1 PM on Monday and continuing through Saturday afternoon with a banquet Saturday evening. ** Note that registration includes all layout visits and operating sessions, and all activities at the hotel except Modeling with the Masters, and admittance to the National Train Show. ** We will support all the traditional activities of the SIG's. ** The National Contest will be fully supported. The contest will be in a prominent room and will be run by the National Contest team. There will be space for model displays, modular layouts and other functions. Those putting their models on display will have the option of entering the People's Choice Contest. ** We will have several prototype tours which may include a Ford plant tour and a cruise on the Detroit River with an emphasis on the industrial aspects of the waterfront. ** We expect to have at least 90 clinics. The clinics will be varied, and each will be given twice. ** We expect to have at least 60 layouts open for visit. Most layouts will be at least 900 sq. ft. in size running to over 3,000 sq. ft. in one or more cases. All layout visits and op sessions will be self-guided so you may take your time.
